Here's what teachers like you are loving about this **Partner Pairing Cards!**

★★★★★ **Extremely Satisfied**

Love love this resource!! I used it to make groups in the beginning of the year and still use it sometimes to mix up and reintroduce students to each other during group work. The students really like trying to find their match and my DL students liked the pictures along with the words.

– Joan J.

★★★★★ **Extremely Satisfied**

This has been a fun way to make random partners. I appreciate the addition of the trio as sometime I end up with an odd number. I don't tell the students what the match is so they need to do a bit of thinking. Easy to prep and put into use. Thank you!

– Susan H.
